

## **LAB1 SHORT STORY**

**SAANVI VENKATESH KULKARNI,1RVU23CSE391**

### **PROMPT**

Write a short, emotionally engaging story designed specifically for an animated video (60–90 seconds). The story should clearly describe visual actions, character expressions, and simple environmental details so animations can be created from the narration. Use simple, cinematic language suitable for AI voiceover. Keep sentences short and expressive. The theme should be inspirational, focusing on overcoming self-doubt and following one's passion. Include strong visual moments that can be animated (facial expressions, movement, lighting changes, transitions). Do not label scenes or use headings. Provide only continuous narrative text that flows naturally for animation.
